In the original publication, the authors identified four errors.

Original text in section 3.3.:

“A Questionnaire was distributed to 230 participants. The number of responses collected exceeded the total anticipated size of 155 by sampling 190 construction professionals from various consulting firms, construction companies and government agencies.

The response rate was approximately 83%, with 190 responding and 40 participants declining.”

Corrected text in section 3.3.:

“A Questionnaire was distributed to 203 participants. The number of responses collected exceeded the total anticipated size of 155 by sampling 192 construction professionals from various consulting firms, construction companies and government agencies.

The response rate was approximately 94.6%, with 192 responding and 11 participants declining.”

Original text in section 4.2.:

“Analysis considered 190 valid responses comprised of reflectively measured constructs.”

Corrected text in section 4.2.:

“Analysis considered 192 valid responses comprised of reflectively measured constructs.”

Original text in section 4.2.1.:

“The number of acceptable segments equalled that of the total response's sampled (i.e., $190/54 \approx 3.4$);”

Corrected text in section 4.2.1.:

“The number of acceptable segments equalled that of the total response's sampled (i.e., $192/54 \approx 3.6$);”

Original text in section 4.3.:

“This was also the case for using PLS-POS in this study of the 190 validated responses.”

Corrected text in section 4.3.:

“This was also the case for using PLS-POS in this study of the 192 validated responses.”

The author states that the scientific conclusions are unaffected. This correction was approved by the Editor-in-Chief. The original publication has also been updated.
