Is there a synergy between artificial intelligence, Erasmus+ PEER-TRAIN training and MoodleCloud?

Anna Grabowska¹

¹Gdańsk University of Technology, Poland

Keywords: AI, Erasmus+, PEER-TRAIN training, MoodleCloud

Artificial intelligence can be used in the teaching and training process to provide a personalized approach to each student.

Erasmus+ PEER-TRAIN training focuses on developing the skills of teachers and trainers who work with youth and adults in the field of education and training.

Artificial intelligence, Erasmus+ PEER-TRAIN training and the Moodlecloud learning platform can together create a synergistic combination that allows the learning process to be tailored to the individual needs of each student, which can contribute to achieving better results in education and training.
